At the close of No. 1, there was a prom se that some train should bring up the lution of the question of friendships. I am inclined to think there is no solution. Not because there is no such thing-but because the reasons why two persons seem to sympathise in a sort of congeniality of feeling, are not so obvious, nor so easily susceptible of clear ellucidation. Sometimes we are deceived for an hour, in the mind, or manners, or temper of a person, by whom one is accidentally seated in a night train. Some strain of conversation may be touched, which will hold for a time. But pass from that one train of association of ideas, and each one grows indifferent to the other-and settles into silence, for the balance of the ride on the same seat. Then again you will be seated by one for whom you have no fancy at al! - with whom you care not to exchange a passing remark, even upon the weather. Then, Thirdly, two strangers will grow sociable on the same seat-pass the night congenially togetherand form an acquaintance and respect for each other, that will last for years, or a Yet one of these persons shall be highly educated-the other not.
